

How To Load The Sample Job Files

The screenshot shows a web application interface with a modal dialog box open. The dialog box has a title bar with a close button and the text "close". Inside the dialog, there is a label "Load XML File:" followed by a text input field. To the right of the input field are two buttons: "Browse_" and "Upload XML". The background interface is dimmed but shows a header with "Load A Saved Job" and "Load A Saved XML File" buttons. Below the header, there is a section titled "ADD ELEMENTS" with a "Page" section containing buttons "+s", "+ff", "+c", and "+b". There is also a "Raw Element" section with icons for "H", "D", and a trash icon. The main content area is titled "Sortable Page Header" and contains a "Text" input field and a "Submit" button. The date "4/3/2010" is visible in the top right corner of the dialog box.

Load A Saved Job

Load A Saved XML File

Job Name: route-demo

4/3/2010

close

Load XML File:

Browse_ Upload XML

ADD ELEMENTS

Page

+s +ff +c +b
